

In April, I met with the Canadian Association of Physicians for the Environment to discuss many public health issues, including their steps to stop fossil fuel advertising. As a result, I want to share the federal petition that I'm sponsoring.

Petition e-4469 calls upon the Government of Canada to legislate a comprehensive ban on advertising, sponsorship, and promotion of fossil fuels companies, products, and services (including gasoline, gas utilities, and internal combustion engine vehicles). With these measures, we can take the next eco-friendly step toward protecting public health.

This petition is open for signature until September 28, 2023, so be sure to hit "Read More" below to add your name today! And please share it with your friends and family.

Together, we can have a healthy, green future.
